Claim Objections

Claims 6-8,10,11,13 are objected to because of the following informalities: In claims 6 & 7, "the gear connection" lacks proper antecedent basis. In claim 8 line 2, "the lifting part, the lifting part" is grammatically incorrect and unclear. In claim 8 line 6, "the grip ends" lacks proper antecedent basis. In claims 10 & 11 line 2, "the lifting part" lacks proper antecedent basis. In claim 13 line 4, it appears that "the" should be inserted before "ground support". In claim 13 line 4, "tomove" should be changed to "to move". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6,13 are rejected under 35 U.S.C. 102(b) as being anticipated by Byrd (5,558,378).

Byrd discloses a device for removing plants from the ground comprising an elongate shaft 16, a ground support 20 pivotally connected to a first end of the shaft and which is permitted to move transversely in relation to the longitudinal axis of the elongated shaft.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3671

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-8,10,11,13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pakosh (5,154,465) in view of Byrd (5,558,378).

Pakosh discloses a device for removing plants from the ground comprising an elongated shaft, four pivot blades, a gear connection with a gear tooth 56, a lifting part 18 and a ground support 34. Pakosh however lacks the ground support being pivotally connected to the elongated shaft.

Byrd teaches that it is known in the art for a ground support 20 to be pivotally connected to an agricultural hand tool. This allows the ground support to be pivoted from a use position to a stored position to allow the device to be compacted for storage.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device of Pakosh by replacing the fixed ground support with a pivotal ground support as taught by Byrd, to allow the device to be compacted for easier storage.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3671

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
